Enrolment Figures: Vocational College Rosenheim

Our School

We are a vocational college located in Rosenheim, Upper Bavaria. Our school provides access to higher education and is specialized in technical sciences, business sciences and social sciences. The college combines two types of schools. The BOS is attended by students aged 19 to 25 who already have an apprenticeship and can therefore directly enter 12th grade, though some of them voluntarily prefix an additional school year. The FOS students are younger in age (16-19) and need to complete two work placements (10 weeks each) in grade 11. During that year they switch between two weeks at school and two weeks of vocational training in workshops, corporate respectively administrative offices or in social facilities. BOS-students are allowed to enroll at any University of Applied Sciences when graduating after 12th grade. Furthermore, they have the option to do the General Higher Education Entrance Certificate one year later.
